

Boris Continuum Complete 7.0.2 FxPlug

October 15, 2010

Release Notes

Please visit our web site at www.borisfx.com for complete detailed information regarding the new filters and features that are included in this product release.

Boris Continuum Complete 7.0.2 FxPlug supports the following host applications:

Macintosh:
Apple Final Cut Studio 3 and above

System Requirements:

Macintosh:
Max OSX 10.5 and higher

New with this Version:

- Swish Pan Transition and Lens Transition filters are now generating the expected result. In the previous version of the software, both of these filters were transitioning to black instead of transitioning to the incoming clip. This issue has been resolved and these filters now render the expected result, transitioning from the outgoing to the incoming clip.
- Edit menu items in the 3D Objects filters categories are now operating as expected. In the previous version of the software, edit menu items, such as copy, cut, paste, select all etc were non-operational and did nothing when selected. This issue has been resolved and the copy and paste functions now operate as expected in these filters.

Registration and Technical Support

Make sure to register your product in order to receive the latest technical and upgrade information. Registered users are often eligible to download free filters from the Boris FX website. Any free filters will be available on the Downloads page at www.borisfx.com.

You can register online at <http://borisfx.com/support/register.html>. We offer registered users one year of free technical support starting from the date of purchase.

Contacting Technical Support
