

Boris XML Transfer 2.0.1

July 20 2010

Release Notes

Please visit our web site at www.borisfx.com for complete detailed information regarding the new filters and features that are included in this product release.

Boris XML Transfer supports the following host applications:

Apple Final Cut Pro 6 and above

System Requirements:

Macintosh:

Max OSX 10.5 and higher

New with this version:

- Added support for BCC 7 filters, transitions and generators so that they appear as expected when a sequence has been transferred from FCP into AE.
- Fixed color and checkbox parameters for several BCC 6 effects that were affected by a problem where some colors and checkbox settings were not appearing as expected when the exported sequence was viewed in AE. Sequences that have instances of BCC 6 filters now appear as expected when viewed in AE.

Registration and Technical Support

Make sure to register your product in order to receive the latest technical and upgrade information. Registered users are often eligible to download free filters from the Boris FX website. Any free filters will be available on the Downloads page at www.borisfx.com.

You can register online at <http://borisfx.com/support/register.html>. We offer registered users one year of free technical support starting from the date of purchase.
