Macintosh:

Adobe CS3, CS4, CS5.

Boris RED 4.3x (via 32 bit FEC installer)

Windows:

Adobe CS3, CS4, CS5.

Boris RED 4.3x (via 32 bit FEC installer)

System Requirements:

Macintosh:

Max OSX 10.5 and higher

Windows:

Windows 7 32/64, Windows Vista 32/64, XP 32/64

Known Issues and limitations:

The following is a listing of the known problems in the product at time of shipping:

- The Beat Reactor function in FEC 6 is not available in the Boris RED host environment
- FEC 6 On-screen Widgets are not available in Boris RED
- Preset load/save and help buttons in FEC 6 are visible but non-operational in Boris RED
- In Adobe Premiere Pro CS5, the Hair Thickness on-screen control is non-functional however the Hair Thickness parameter in the Effect Control Window operates as expected
- In Adobe After Effects, lights that have been parented to a null object remain static when selected in FEC filters that support host lights

Registration and Technical Support

Make sure to register your product in order to receive the latest technical and upgrade information. Registered users are often eligible to download free filters from the Boris FX website. Any free filters will be available on the Downloads page at www.borissfx.com.

You can register online at <http://borissfx.com/support/register.html>. We offer registered users one year of free technical support starting from the date of purchase.
